Reliable and flexible

DC-3300 and DC-7600

The card printers from DASCOCOM makes reliable prints on a wide range of plastic cards and offer benefits to help them stand out from other card printers. Both commercial devices are designed for demanding applications and large batches, which can be printed both single and double-sided.

Furthermore, both printers offer safety features and extra features for printing as well as encoding. They allow, for example, customised watermarks to be added to increase the safety of a card.

You can intuitively create a range of layouts using the basic version of the DASCOCOM CardEditor software, supplied as standard.

The DC-3300 can print out medium to large-scale batches at speeds of up to 220 cards per second, and thanks to its 300 x 1200 dpi resolution can offer sharply contoured cards. It also has a large card feed capacity of 100 cards and can be equipped with an encoder.

With its 600 dpi resolution, the DC-7600 is the next stage in re-transfer technology and is designed for medium to large-scale batches. The over-the-edge print allows the borderless printing of cards and brilliant appearance. With both a large feed and a storage area, the card handling is therefore ideally suited to the material used, and this model can also be equipped with an encoder.

	Equipping the card	Processing	Input	Printing/film coating
DC-3300	 Cards with a signature field  Cards with a visible chip  Cards with an RFID chip  Cards with a magnetic stripe	 Non-printable area on all four sides  Good quality  17 sec print time (Single Side) 22 sec print time (Dual Side)	 100 cards Input 30 cards Output	 4/4 colour print and the option of sealing with security features (YMCKO YMCKO)  4 colour print and the option of sealing with security features (YMCKO O)  1/1 colour print (K K)
DC-7600	 Cards with a visible chip  Cards with an RFID chip  Cards with a magnetic stripe	 Borderless printing  Excellent quality  25 sec print time (Single Side) 55 sec print time (Dual Side)	 250 cards Input 250 cards Output	 4/4 colour print and the option of sealing with security features (YMCKH YMCKH)  4/4 colour print (YMCK YMCK)  4/1 colour print (YMCK K)

Solid and robust

Model	Technology	Resolution	Print Speed	Interfaces	Card thickness	Security features	Card types	Weight	Driver
DC-3300	Direct to card	300 x 1200 dpi	Single Side: 220 cards/h Dual Side: 165 cards/h	USB (2.0), Ethernet (10/100)	0,25 - 1,25 mm (10 - 50 mil)	RFID coded ribbon, Overlay function	PVC, PET, PET-G, 85,6 x 53,98 mm (ISO ID-1/CR-80 format)	7 kg	Windows 32 and 64 Bit
DC-7600	Re-transfer	600 dpi	Single Side: 144 cards/h Dual Side: 65 cards/h	USB (2.0), Ethernet (10/100)	0,50 - 1,25 mm (20 - 50 mil)	RFID coded ribbon, Overlay function, card tray lock	PVC, ABS, PET, PET-G, PC 85,6 x 53,98 mm (ISO ID-1/CR-80 format)	22 kg	Windows 32 and 64 Bit

Features

Excellent print quality and watermarks

Due to the high resolution of the printers, micro fonts, complex barcodes and detailed images can be reproduced in high quality. By using YMCKO or YMCKH colour ribbons, customised watermarks and logos can be achieved quickly and at reasonable value as extra safety elements.

High productivity and easy handling

With an output of 220 (DC-3300) or 144 (DC-7600) cards per hour for single-sided colour printing, the DASCOM printers are most suitable for medium to large-scale batches. It is very easy to add materials. Both the YMCK colour ribbons as well as the transfer ribbon on the DC-7600 are ideally coordinated to each other, and thereby allow unsupervised printing of up to 500 cards.

Easy connection

The printers have a USB interface as standard. The standard equipment also comprises an Ethernet interface, which allows connection to a network.

Creating cards

With the free basic version of the DASCOM CardEditor software, diverse card designs can be easily created and printed. With the professional version, they can also be linked to databases.

Wide range of cards

The DC-7600 can process cards made of different materials - PVC, PET, polycarbonate as well as ABS. With dimensions of 85.6 x 53.98, both popular ISO ID-1/CR-80 formats can be processed while the smoothing device provides perfect surfaces, even on uneven cards.

Integrated encoder

For both ranges of printers, printers with integrated encoders such as Mifare are also available, in addition to the basic models.

THE DASCOM SERVICE PROGRAM

**3 YEARS
BRING-IN-
GUARANTEE**

3 YEAR GUARANTEE

From the delivery date, you receive a 36-month bring-in guarantee for all DC-7600 and all DC-3300 models. This guarantee covers all replacement parts. Not included in the price are consumables and wear parts. Their installation is invoiced at the respectively-valid service price list.

WHO WE ARE

DASCOM is a worldwide company and offers professional solutions for printers and LEDs. From our European headquarters in Ulm, Germany, we look after customers all over Europe, Africa and the Middle East.

WHAT WE OFFER

Innovative technology and convincing products - they are the milestones we use to measure our progress: Robust and reliable printers which will reduce your operating costs even with large printing volumes. Regardless of what your demands are - DASCOM has the right printer for your needs and your budget.
